

The B series is designed as a modular Queue System. It directs a customer holding a numbered ticket to the first available room or counter. Customer collects pre-printed ticket from wall-mounted dispenser and the call is made from a single button or keypad at each caller's location. Optional over counter or room digit displays identify the caller.

**Display features:**

- High contrast seven segment LEDs.
- 10 cm high for excellent visibility
- Integral power supply
- Integrated speaker
- Announcement bell
- Adjustable volume control
- Flush wall mounting
- Optional pre-recorded voice announcement.
- Space for vinyl fixed lettering
- Painted case in any colour

**Call button functions:**

- Single button push to call next number and announces caller's location

**LED mimic keypad option functions:**

- Call next number and announces caller's location.
- Can see number called on keypad.

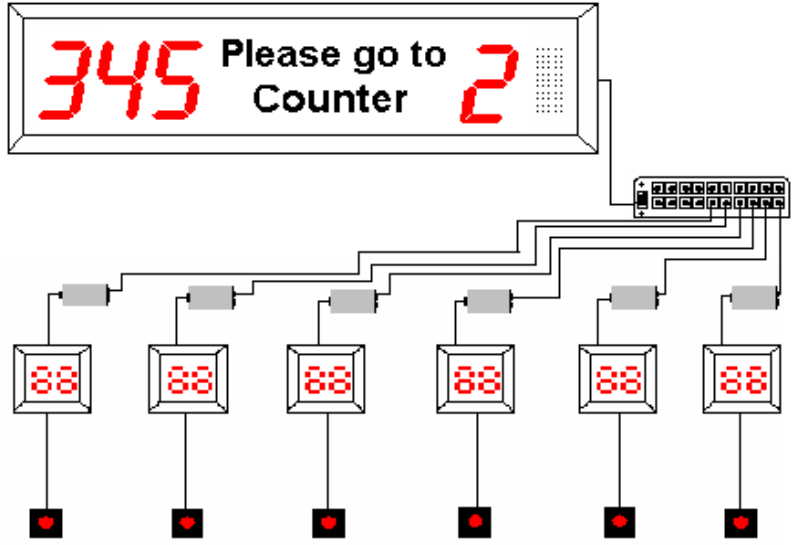

**Over counter display:**

- Identify which counter has called
- Flashes to attract attention
- Clearly visible 10cm high digits
