

This Queue System is designed for where sets of numbers are needed to be shown at the same time, directing a customer holding a numbered ticket to a single location. Ideal for Food order or Pharmacy counters. The mimic keypad allows ticket numbers to be called out of sequence. Customer is issued with pre-printed ticket; the call is made from a LED mimic keypad at a single location. A new call appears on the lower right side of the display and stays on until it reaches the top left.

Model	Size mm	Digit height
JQH 100	650 x 360 x 60	5.8cm (2.3")
